ABOUT US

Solar Power is the energy which we can generate and utilize from the sun. The sun is the infinite resource of solar power and can be used in many constructive ways. It is a renewable and non-perishable source of energy that we can rely on. With mammoth problems like climate changes and fuel scarcity creeping over the world, SOLAR POWER is the safest and most reliable option for us.

We at UJJAL VIKAS SOLAR INDIA LIMITED aim to propagate the use of solar energy in every nook and corner of the nation. Our company has credited intense research and knowledge in the field on Solar Energy and we collectively aim to bring about the change in the energy consumption pattern of the citizens of India.

The Government of India aims to be World's Largest Renewable Energy Expansion Programme by 2022 and UJJAL VIKAS SOLAR INDIA LIMITED wishes to contribute to this cause. We are the pioneer in Solar panel manufacturing and trading, based in New Delhi.

our Vision Mission & values

VISION

Our vision is to provide the highest quality services and products to the population by exceeding the existing bar of excellence and pushing it more further. We ensure a highly professional team of individuals with promising work calibre to cater to your needs.

MISSION

The government of India aims to generate 175Gw of solar energy by the year 2022. We at Ujjal Vikas Solar India Limited contribute to the mission. Ujjal Vikas Solar India Limited provides the solar panels and the set up of solar panels in the rural areas and propagates the domestic use of the solar panels.

Our goal is also to fulfil the make in India ideology and manufacture our own product.

We wish to spread out our to the domestic sector as well to create an awareness regarding solar energy and its advantages. To make people take conscious decisions regarding energy consumption and to make the world a better place to reside in.

OUR VALUES

The core value of our is to provide best services and products and to spread the awareness to a greater population. We aim to work on the strategies that underlie our work and help us to achieve our vision and mission.

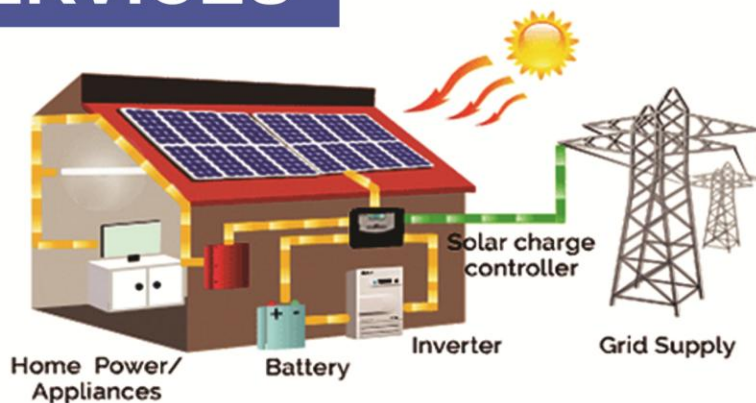

OUR CHANNEL PARTNER

Dishachi Energy was established in 2014 as a Manufacturer & Integrator in Solar Sector. Dishachi Energy is leading in manufacturing, Integration & Educational Sector. Dishachi is certified from GERMI (Gujarat Energy Research and Management Institute) a certified solar training centre which provides detailed knowledge of Solar Project Design, O & M, Trouble shootings, Project Design Using Software, Procedure & Permission & General Administrative Process for Solar Project.

We have a presence in 10 states in the commercial and domestic market, Andhra Pradesh, Maharashtra, Odisha, Karnataka, Madhya Pradesh, Uttar Pradesh, Bihar, Assam, Jharkhand, and Chhattisgarh.

UVSIL AND DISHACHI have collaborated together since 2014, the quality products and services we built help to achieve the goal. With joint efforts of each member of Uvsil and the effective work, Ujjal Vikas Solar India Limited is now a recognized Public Limited which caters to the solar energy needs in the commercial as well as residential sector in PAN India

- Installation and services even after sales.
- Easy finance options at 0% EMI.
- Product tracking through remote monitoring.
- New product technology with auto cleaning feature.

WHY US

SMARTEST ENERGY CHOICE

ONE- STOP SOLUTION

SIMPLE & AFFORDABLE

(We understand the value of money and are offering solar system installation in commercial as well as residential areas at EMIs with 0% interest rate)

Experienced & Skilled Team

(We take care of the complete professional purchasing and commissioning of solar energy)

Robust After Sales Services

(Including annual maintenance packages and post-sales maintenance options)

Crafted with Precision

(We engineer, design, and manufacture all our products with the highest precision)

In Harmony with Nature

(We make sure every project we endeavor interwinning commercial or personal benefits must fulfill our social and environmental responsibilities)

GO GREEN, LIVE GREEN

Clean Energy We as a community bear the responsibility towards our future generations to provide a clean, green and serene environment.

Low - Cost Installation & Maintenance From the wide array of Power generating alternative energy eco-system, solar energy plants require limited installation time and resources, as well as there maintenance, is at the minimum.

Sustainable & Smart Asset The Quality of projects engineered, procured, and constructed by UVSIL have a healthy life span of 25 years or more. Furthermore, Solar plants yield better profits, have a short payback period, returns up to 18% per annum on your invested amount.

Fit for Any and Everyone The sun has been a giver and is available for free of cost. India is on the brighter side with an average of 6 to 7 hours of sunlight every consumer's requirement (a need of single night bulb to lighting up the home/ establishment) can be fulfilled by a Solar Plant.

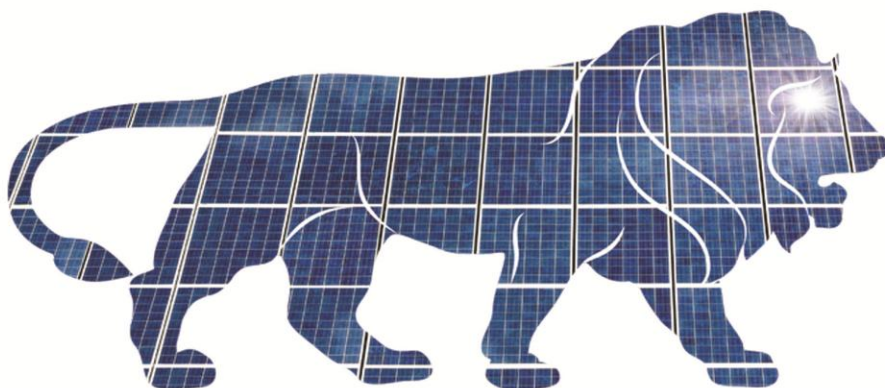

Government Incentive It has never been simpler to get subsidies and government provides several incentives to promote solar power.
